

## BIBLIOGRAPHICAL RECORD.

Authors and Societies are requested to forward their works to the Editor at the earliest date possible. We ask our readers to inform us of the publication especially of those works which are not generally consulted by entomologists.

B. Pickman Mann.

(Continued from page 24.)

- \* 46. THEO. B. COMSTOCK, B.S. p. 76-77.

Peculiar faunal characteristics of the Yellowstone National Park, and their supposed explanation; advantages for study in the Park.

- \* 47. W. G. FARLOW, M.D. p. 113.

Flowers of *Aconitum septentrionale* perforated by an insect.

- \* 48. C. V. RILEY. A new (?) *Ægeria* Maple Borer. p. 123-124.

*Trochilium acericolum* = *Ægeria acerni*. [See above, No. 45.]

- \* 49. W. G. BEAL. The Fertilization of Gentians by Humble Bees. p. 180-181, p. 226.

Actions of *Bombus* sp.? upon flowers of *Gentiana Andrewsii* and *G. crinita*; variety of contrivances by which insects fertilize flowers.

- \* 50. C. V. RILEY and A. S. PACKARD, JR. Entomology in Missouri. p. 181-188.

Discussion on the number of segments in the head of an insect; on classification; on *Mytilaspis pomicorticis* Riley.

- \* 51. C. V. RILEY. Economic Entomology. p. 189-190.

Demand for more attention to, and better representation of the agricultural interests of the country. Inadequacy of measures propounded for the wholesale destruction of noxious insects.

- \* 52. C. V. RILEY. The Habits of *Polistes* and *Pelopæus*. p. 229-231.

- \* 53. T. G. GENTRY. Notes on the Plant Lice. p. 231-233.

Time of occurrence and functions of winged and wingless forms; difference and cause of production of the sexes.

- \* 54. F. E. L. BEAL. "Assembling" among Moths. p. 234-236.

Attraction of male *Attacus Promethea* moths to females in secluded and unnatural places.

- \* 55. Prof. A. M. Mayer. Organs of Hearing in Insects. p. 236-237.

Diverse action of the variously long fibres of the antennæ of the male mosquito under the impulse of different sound-vibrations, coming in different directions.

\* 56. A. S. PACKARD, JR. Occurrence of *Telea polyphemus* in California. — A correction. p. 243-244.

Correction of No. 1 of this Record (applying in part to Amer. Nat., vol. vii, p. 454). *Telea polyphemus* does occur along the Pacific coast; "*Gorytodes uncanaria* Guen." = *Platea Californiaria* H.-Sch.; *G. trilinearia* Pack. = *P. trilinearia*.

\* 57. S. H. SCUDDER. The Natural History of a Polymorphic Butterfly. p. 257-266.

Distribution, food-plants, forms, seasons, habits and enemies of *Iphioides Ajax*. [See this Record, No. 4.]

\* 58. A. S. PACKARD, JR. Nature's Means of limiting the numbers of Insects. p. 270-282.

List of some birds, insects, and other animals which eat insects; prolificacy of injurious insects; importance of insect-enemies, and means of promoting their action.

\* 59. S. H. SCUDDER. The Preservation of Caterpillars by Inflation. p. 321-326, fig. 76-77.

Directions for preparing larvæ for the cabinet by inflating and drying their emptied pellicles.

\* 60. DR. OSCAR LOEW. The Honey-ants. p. 365-366.  
Habitations, honey-holders and honey of *Myrmecocystus Mexicanus*.

---

BUTTERFLIES ATTRACTED BY LAMP-LIGHT. — By permission of the keeper, I recently visited Sankaty Light, Nantucket, to collect moths. Unfortunately the night was clear, though only starlight, and between eight and nine o'clock only two moths (Noctuids) came to the lantern. Since then, however, on the cloudy and unusually warm night of Sept. 11th, insects were so numerous as to give the keepers much trouble by obstructing the flow of the oil in the lamp; and the under keeper, Mr. Frank B. Murphy, came afterward to see me, bringing a tin box containing a dozen living specimens of *Nymphalis J-album* taken at night in the lantern, saying that these had given most trouble; *hundreds had flown into the lantern*. I do not recollect to have heard a similar instance of the attraction of butterflies to light. Sankaty is a powerful flash light, and is visible over a great part of the island.

S. H. Scudder.

PSYCHE is issued post-paid once a month, by the Cambridge Entomological Club, at the following rates, payable in advance to the editor:

To subscribers in North America, one dollar; to subscribers abroad, five shillings, six francs, or one and two-thirds thalers. (Foreign subscriptions may be sent in available postage-stamps.)

Notes on the history, habits, and occurrence of insects and other Arthropods are solicited from all observers.

Advertisements will be inserted on reasonable terms.

Address communications: Editor of PSYCHE, Cambridge, Mass., U. S. A.

No. 6. was issued October 9, 1874.
